

**Communications Division, Department of Public Utilities
City of St. Louis**

APPLICATION FOR TELECOMMUNICATIONS PERMIT

TO THE BOARD OF PUBLIC SERVICE:

The undersigned having complied with all the requirements of the Revised Code of St. Louis, including rules and regulations authorized relative to the installation and maintenance of wires, underground conduits and other telecommunications facilities, makes application for permission to:

(Describe project in detail, giving footages and specific location. Attach drawing of proposed construction.)

trench or bore for the purpose of installing a private communications system, consisting of three 1-1/4-inch PVC innerducts. All duct will be placed approximately 42 inches deep. Beginning at an existing manhole on the property of ABC Company, at 1000 Main Street starting on the west side of Main Street, bore east across Main to a point approximately 10 feet from the east curb. Then proceed north for 300 feet to Sunshine Avenue, placing a 4-by-4-by-4 manhole at the southeast corner of Main and Sunshine. Proceed east in Sunshine, approximately 10 feet off the south curb, for 1,358 feet, placing a 4-by-4-by-4 manhole at the southwest corner of Sunshine and Lake avenues.

All work will be in compliance with National Electrical Codes and local ordinances.
