

# Create Scenery That Will

# Last A Lifetime

Plant and Care for Trees

Beauty and splendor are some of the many benefits that trees can contribute to our surrounding environment. Picturesque scenes like this are possible whenever trees are planted and properly nurtured. Therefore, the Forestry Division encourages everyone to support and participate in community forestry activities such as tree care and tree planting. Help us create scenery that will last a lifetime.

For more information about tree planting and tree care contact the Forestry Division at 314-613-7200 or visit us on line at:
